Cairo, Egypt

OBJECTIVE

Junior Full-Stack Software Engineer driven by the idea of digitalizing real-world operations and solving business problems through well-designed algorithms and systems. I've contributed to 10+ production-ready web projects by understanding the problem first, then designing efficient data models, scalable back-end logic, and user-focused interfaces that deliver real value. I'm looking to grow in a team that treats software as an investment and builds products with long-term impact rather than short-term code.

EXPERIENCE

- **Aviation AI Data Labeling Specialist – Reviewer** 01/2026 - Present
Alignerr Freelance - Remotely
 - Transcribed and verified aviation communications between ATC and pilots across ground, ramp, and tower channels.
 - Ensured high accuracy of callsigns, taxi instructions, waypoints, headings, and standard aviation phraseology.
 - Reviewed and corrected annotated data to maintain consistency and quality standards.
 - Served as a Reviewer, auditing team outputs and providing actionable feedback to improve performance.
 - Developed a Chrome extension to enhance annotation speed and team accuracy.
 - Contributed to building structured, high-quality datasets for AI training systems.
 - Tools: Chrome Extensions, Data Annotation, QA Review
- **AI Trainer – Front-End Engineering & UI Quality** 04/2025 - 08/2025
Scale AI Freelance - Remotely
 - Built production-ready front-end pages under strict design and functional guidelines to improve AI model outputs.
 - Ensured interfaces were responsive, accessible, and aligned with real-world engineering constraints.
 - Evaluated AI-generated designs, providing actionable feedback to guide models toward practical, user-centric solutions.
 - Built interactive tools used to enhance AI outputs.
 - Tools: React, TypeScript, Next.js, Tailwind CSS
- **Data Entry Assistant** 05/2019 - 10/2020
Diakonia Egypt | Cairo, Egypt Contract - Hybrid
 - Managed and verified large data sets to ensure consistency and accuracy.
 - Tools: Microsoft Word, Excel, Powerpoint, Databases

EDUCATION

- **Bachelor's Degree in Computer Science** 10/2021 - 07/2025
El-Shorouk Academy El-Shorouk, Egypt
 - Grade: Very Good
 - Graduation Project: Game Zone - Excellent
 - * Developed a 3D card gaming platform using C#, including full game logic, interactive UI, and multiplayer functionality
 - * Implemented performance optimizations for smooth 3D rendering and real-time user interactions
 - * Designed maintainable code architecture and solved gameplay constraints, including state management, scoring, and game rules enforcement

PROJECTS

- Fantazina : [Fantasy League Platform]

Tools: [Angular, Typescript, Bootstrap, PHP, MySQL, Laravel]

- Built a full fantasy league making platform with leagues, teams, transfers, captains, and power-ups
 - Designed complex data models to handle dynamic team stats, scoring rules, and real-time leaderboards
 - Developed end-to-end solution using Angular, TypeScript, PHP, and MySQL, implementing modular architecture for maintainability
 - Optimized performance bottlenecks to ensure fast, smooth experience under concurrent load
 - Implemented secure interfaces with role-based access control and OTP authentication
 - Resolved real-world issues such as data conflicts, scoring edge cases, and database constraints to maintain system integrity
 - Delivered responsive, production-ready platform serving 1,500 concurrent users in the first month

10/2025 - Present

Smart Arabic Search Engine : [Semantic Search Engine]

Tools: [PostgreSQL , Arabic NLP , TF-IDF , Full-Text Search , Node.js]

- Built a smart Arabic search engine to handle complex Arabic morphology, diacritics, and word variations, solving inaccurate and slow search issues
 - Designed PostgreSQL indexing and triggers to efficiently manage 1M+ records and enable sub-second queries (max 0.4s)
 - Applied TF-IDF, Full-Text Search, and ranking algorithms to deliver accurate, relevant results
 - Optimized database queries and system architecture for fast, scalable, and maintainable performance

01/2026 - 02/2026

Scout System: [Complete Scout System – Dashboard, QR Attendance, and DB Infrastructure]

Tools: [Angular, JavaScript, Typescript, Bootstrap, PHP, MySQL, Laravel]

- Developed an admin dashboard with QR-based attendance tracking and device authentication, managing over 500 scouts.
 - Built an end-to-end system using Angular, TypeScript, PHP, and MySQL, handling 10,000+ records efficiently.
 - Implemented real-time tracking and internal communication features, reducing response time by 40%.
 - Created responsive interfaces for seamless accessibility across devices, supporting 100% of active users.
 - Ensured data integrity, performance optimization, and secure access throughout the system
 - Added a communication ticketing system for organized internal messaging between scouters and admins, resolving 200+ tickets per month.

05/2025 - 07/2025

Lens & Light : [E-commerce Platform for Photography Gear]

Tools: [React.js, Next.js, Laravel, MySQL, Google Stitch AI]

- Designed and developed a full-stack E-commerce platform, handling product listings, user authentication, and shopping cart functionality.
 - Implemented advanced front-end techniques including lazy loading, server-side rendering, dynamic imports, and state management, optimizing performance for desktop and mobile users.
 - Built secure back-end services using Laravel, including API endpoints, Sanctum authentication, MySQL integration, and CORS handling, supporting scalable and robust interactions.
 - Created a modern, AI-assisted UI/UX with Google Stitch AI, delivering a responsive, intuitive, and visually appealing interface.

02/2026

SKILLS

- Programming Languages:** C++, JavaScript, TypeScript, PHP, SQL
 - Front-End Development:** CSS, ES6+, Bootstrap, Tailwind, Fetch API, Next.js, React, Angular, Express.js
 - Back-End Development:** Laravel, MySQL, Node.js, WordPress Development, REST APIs , JWT, Authentication
 - Advanced Web Development:** Performance Optimization, Web Accessibility, Responsive Design
 - Database Systems:** MySQL, PostgreSQL, Firebase Realtime Database
 - Other Tools & Technologies :** Git, GitHub, VS Code, Postman, Agile/Scrum, Figma, Chrome DevTools, CI/CD, Docker, AWS
 - Soft Skills:** Problem Solving, Active Searching, Adaptability, Time Management, Communication, Critical Thinking, Leadership, Team Collaboration, Analytical Thinking, Continuous Learning, Attention to Detail, Creativity
